56 <b>Project Brief:</b> I developed a <i>Student based Management System</i> as my academic
57 project. The project helped me understand the full software development and enhanced my coding
58 and problem-solving skills. I used software tools such as <b>HTML, CSS, JavaScript, and
59 MySQL</b>. Overall, the experience was interesting and improved my teamwork and project
60 planning abilities. Feedback from faculty was positive, appreciating the functionality and
61 presentation of the project.
